## DRIGMORN3 - SPARTAN-6

Drigmorn3 is the first Enterpoint Spartan-6 board to release. We have built this board as a starter product but it also has strong credentials for the FPGA microprocessor/controller OEM markets. The on-board headers take our standard expansion modules like ADC and DAC modules and we also have 1 or 2 super modules planned for embedded application support.

### Summary Features

Spartan-6 FPGA – LX16 initially  
1 Gbit DDR3 SDRAM  
128 Mbit Flash  
16K EEPROM  
2 x PS2  
10/100 Ethernet  
USB (FT232R)  
Push Switches  
Hex Switch  
LCD – 16x2  
4 x Traffic Light LEDs

We are releasing the first production boards to sale in early October. Newsletter subscribers and previous buyers will get priority to what is initially a limited supply of boards. Contact us a.s.a.p. to get on the pre-order list before this is opened up to our general website.

# ESC Boston

Enterpoint are showing at ESC Boston from 22<sup>th</sup> September to 23<sup>rd</sup> September. You can find us at booth 914. Leave a business card to enter our Drigmorn3 raffle and also get 5% off your next order.

## Moving

Enterpoint are moving. We are currently negotiating options on new office space to allow the expansion of our design team. This will mean leaving of home at MHSP that we have had for the past 10 years and the loss of our existing UK phone numbers as a result. The US phone number, website, email and the FAX number will be unaffected by the move.

We hope to complete the move in Q4 and a future newsletter will give an update on new UK phone number
